

UNOMarker HD

Single Lens Laser Marking System

The UNOMarker HD is the ultimate solution for inclusion mapping & marking rough diamond in minimum time and maximum accuracy. The system contains HD technology that allows High Resolution mapping of the inclusion and the rough surface

Product Highlights:

- Advanced Laser marking unit for visible and extremely accurate laser line.
- New algorithms allow very fast planning stage and marking process.
- Marking options for all facets including table, upper and lower girdle, crown and pavilion facet, culet for sawing and polishing.
- Laser Scanner for mapping of holes and grooves.
- HD digital camera for accurate mapping of the rough surface and identification of the smallest visible inclusions.

Inclusion Mapping

Optimal One-Stone Planning

Optimal Two-Stone Planning

Inclusion mapping & Excellent marking
