

## Scanox Tender HD Mini Portable Rough Analyzer

The Scanox Tender HD is world's first portable system for measuring and planning rough diamond in high-resolution and high speed Calculation technology. This system comes in light weight and laptop connectability.

### Product Highlights:

- HD digital colored camera for identification of the smallest visible inclusions and glatz.
- Powerful algorithms are used to calculate millions of cutting options.
- Automatically calculates the rough price for bids according to Rapaport list.
- Precise laser scanner for optimal mapping of the rough surface like holes & grooves.
- Measure up to 100 carats.
- Connect to Laptop via single USB connection.
- Based on 64bit technology for planning the rough diamonds in ultrafast calculation capacity.
