RAPAPORT... OGI Systems Ltd. has been granted the prestigious contract to be the main supplier for Julius Klein Diamond (JKD) Company, recently established in Namibia.

OGI Systems will supply the JKD factory with machines for measuring and laser marking diamonds.

JKD tested and compared OGI System with other existing instruments appearing in the diamond market and came to the conclusion that the new OGI system's technologies are highly advanced. In addition, they reveal more inventiveness than the systems manufactured by other companies thanks to the advanced USB Technology used by OGI in the manufacture of its various products. OGI was the first company that developed, assimilated and marketed systems for the marking of diamonds by means of USB Technology.

Daniel Ben Jano, CEO of OGI Systems Ltd wishes to announce that his company is very satisfied with the expanding cooperation with JKD.

"This association with JKD illustrates the direct control of OGI Systems Ltd as the main supplier of Technological solutions for [Diamond Trading Comany] sightholder firms," Ben Jano said.
