(Rapaport...May 25, 2005) Ogi Systems Ltd., is incorporating the new GIA cut grading system to allow its manufacturers, dealers, retailers, and appraisers to predict a cut grade before their diamonds are sent to the GIA Gem Laboratory for grading services.

The company also made available its Megascop software in support of the American Gem Society (AGS) Laboratory performance grading software for AGS Lab members only. For the first time there is a cut-grade on a fancy shapes. After five years of research and development, the AGS Labs is able to present the industry with a highly advanced system that will make it possible to cut grade fancy shape diamonds.

Ogi Systems specializes in the development and manufacture of systems for determining the optimal yield from a rough diamond; laser systems for marking and cutting rough stones; automated systems for measuring and analyzing polished stones; laser systems for inscribing on the diamond's girdle; and technology that will enhance sales in jewelry stores. They will perform demos at JCK Las Vegas at booth # 60603.
